Dear Mr. Megdich,

I am submitting my resume for consideration as a candidate for an end-of-studies internship within Freedom Of Dev, starting February 2022 and lasting a minimum of 4 months. Please find my CV attached.

I am particularly drawn to accomplishing this internship at FOD because of its renowned modern enterprise culture, focus on high-quality training accompaniment, as well as challenging projects such as those proposed in the catalog of 2021 graduation projects.

During my years at "Institut International de Technologie de Sfax", I have completed a varied set of housework and projects giving me a familiarity with modern approaches to software development such as the Agile methodologies and specifically the Scrum framework.

I also had the opportunity to develop intermediate skills in web development using frameworks like *Angular*, *VueJs*, *NuxtJs*, *Bootstrap* and *Tailwind CSS*.

More recently, I got to study mobile development using *Flutter*, as well as receiving introductions to Machine Learning and Big Data concepts.

In Addition, during the past summer, I performed an internship as a Front-end web developer. Due to the ongoing pandemic, it became an opportunity to learn how to work remotely while keeping a regular feedback loop and integrating *Git* into my process.

Furthermore, I've had the chance to take part in and currently manage various clubs and associations both in Tunisia and Belgium which taught me the importance of team collaboration and good verbal communication.

Finally, since september of 2019, I have been working in my free time on the creation and publishing of my own video game. With various tasks ranging from scriptwriting, art, and 3d asset creation to development and marketing, the project required a good deal of time management and self-education.

Thank you for considering my application, I look forward to the opportunity to discuss this further in an interview.

Sincerely,
Chedi Feki
